

RAMI AFIF

Full-Stack AI Engineer | Multi-Tenant SaaS + POS | LLMops / RAG

Zamboanga City, Philippines | +63 932 512 9707 | rami.afif88@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Certified Associate AI Engineer and full-stack developer building AI-enabled SaaS across FastAPI, PostgreSQL, Redis, Next.js, AWS, and Vercel. Flagship project: a multi-tenant AI storefront + POS platform with tenant-safe APIs, inventory, variants, cashier workflows, receipts, shipping, fulfillment, analytics, and bilingual English/Arabic UI.

8 AI apps shipped | SaaS + POS | AWS / Docker / Vercel | RAG + LLMops

CORE TECHNICAL SKILLS

AI / LLM: OpenAI, Claude, LangChain, RAG, vector search, FAISS, ChromaDB, Sentence Transformers, Hugging Face, Groq, Ollama, OCR

Backend / SaaS: Python, FastAPI, Flask, REST APIs, PostgreSQL, Redis, SQLAlchemy, Alembic, JWT, RBAC, row-level security, async APIs

Frontend / Cloud: TypeScript, React, Next.js, TanStack Query, Streamlit, Docker, GitHub Actions, AWS ECS/RDS/S3/CloudFront/WAF, Vercel

Workflow: AI-assisted SDLC, architecture planning, code review, test/lint gates, migrations, documentation, Git, SQL, VS Code

FEATURED PORTFOLIO PROJECT

Multi-Tenant AI Storefront + POS SaaS | *Flagship full-stack SaaS platform*

GitHub: github.com/afif103/ai-storefront-platform | Portfolio: rami-afif-portfolio.vercel.app

- Built an end-to-end multi-tenant SaaS platform for SMB and charity storefronts with online storefront, POS checkout, cashier mode, receipts, inventory, customer records, shipping, fulfillment, and sales reporting.
- Designed tenant-safe backend patterns using FastAPI, PostgreSQL row-level security, SQLAlchemy/Alembic migrations, Redis, JWT/RBAC, audit events, cursor pagination, and role-gated APIs.
- Delivered commerce operations: catalog/images, Arabic/English content, SKU/barcode, variants, payment methods, checkout shipping fees, order details, customer linking, and repeat customer history.
- Implemented POS features: variant picker, shift management, payment capture, receipt reprint, order cancellation with reason, stock movement tracking, and automatic stock restore on cancel.
- Built cloud-ready deployment architecture with AWS ECS Fargate, RDS PostgreSQL, S3, CloudFront, WAF, Docker, GitHub Actions, and Vercel frontend deployment.

SELECTED AI PROJECTS

APE (AI Productivity Engine) | *Full-stack AI platform*

- Developed conversational AI, AI web research, code generation/review, OCR extraction, async batch processing, real-time tracking, RAG pipelines, vector search, and multi-agent orchestration using FastAPI, PostgreSQL, Redis, ChromaDB, Docker, AWS EC2, and Vercel.

AI Resume & Job Matcher | *RAG + GPU matching*

- Created a private resume/job matching app using LangChain, FAISS, all-mpnet embeddings, CUDA acceleration, PDF parsing, scoring, and AI rewrite suggestions.

AI Movie Recommender | *RAG + LLM demo*

- Built a Streamlit RAG recommender using Llama/Groq, Chroma, LangChain, and local/cloud fallback to demonstrate semantic retrieval and LLM response generation.

PROFESSIONAL EXPERIENCE

Independent Full-Stack AI / SaaS Developer - Self-Employed | Oct 2025 - Present

- Designed, built, tested, and deployed AI/SaaS applications end-to-end across frontend, backend, database, cloud deployment, documentation, and QA workflows.
- Led the Multi-Tenant AI Storefront + POS platform from MVP to V2 operations features using phased architecture planning, migration-first backend work, and disciplined test/lint gates.
- Built 8 AI applications covering RAG, OCR, multi-agent research, resume matching, vector search, web scraping, production dashboards, and cloud deployment.

Visual Basic Developer - Saranay Recruitment | 2010 - 2012

- Built an internal recruitment system using Visual Basic and SQL Server with database-backed workflows and reporting.

Construction Assistant - Holyland Construction | 2012 - 2024

- Supported project execution, purchasing, documentation, and site deadlines; strengthened operations, coordination, and delivery under pressure.

CERTIFICATIONS & EDUCATION

- Associate AI Engineer for Developers - DataCamp, Nov 2025 (OpenAI, Hugging Face, Pinecone, LLMops, RAG)
- Python Programmer - DataCamp, 2020 | Data Analyst - Refocus, 2023 | Introduction to Software Engineering - Coursera, 2023
- B.S. Computer Engineering - Universidad de Zamboanga, 2009

Open to remote AI Engineer / AI Developer / Full-Stack AI Engineer roles
